Net10 Home Phone FAQ

- ❖ **What is the Net10 Wireless Home Phone?** It is a wireless device that allows you to use your existing telephone to make and receive calls, and it does not require a personal computer, high-speed internet or a landline. It's a new wireless, no-contract service from Net10 that allows you to save money on your home phone bill.
- ❖ **Can I use a fax machine with my Net10 Wireless Home Phone service?** Unfortunately, no. The Net10 Wireless Home Phone is not compatible with data services such as fax machines, DVR services, credit card machines, medical alert services, or some home security systems.
- ❖ **Can you have the same number on more than one phone?** Yes! Net10 allows our customers to have the same phone number on all connected devices.
